

Eastern Catalytic Seamless Converter

NEW

Revolutionary one-piece design eliminates seams and increases performance

The new Eastern Catalytic Seamless Converters feature a shell that's "micro-spun" as a single piece unit. This innovation eliminates the chance for welds or seams to open up over time, because there aren't any!

Better performance

The smooth inside shape of these spun units allows more efficient exhaust flow and the ability to withstand greater exhaust pressures without leaking. They're perfect for high performance vehicles and hard-to-fit, low profile applications.

Built to last

Built to aerospace standards, Eastern Catalytic Seamless Converters have superior structural integrity. The single piece design eliminates the need for external components and welds, increasing durability and reliability.

- 4" diameter body rated for 3.8L/4,250 lbs. to 5.9L/6,000 lbs.
- Available in a variety of lengths and inlet/outlet sizes up to 3"
- Ends are left unhardened for easier clamping
- Attractive appearance
- Meets emission and performance requirements

OBD II Compliant* / 49 States

*Not for installation on OBD II vehicles in CA

**EASTERN[™]
CATALYTIC**

World Class Catalytic Converters

• More efficient exhaust flow

• No seams or welds to open up

• Features Eastern's proprietary catalyst chemistry

OBD II Compliant* / 49 States

Eastern Manufacturing: A World Leader In Catalytic Converters.

Quality

World class quality has helped earn Eastern Catalytic converters certification in over 48 countries around the globe. Continual improvements in our design, production, and product delivery systems have made Eastern the smart choice in converters.

Coverage

We give you excellent coverage for cars, light trucks, SUVs, and vans. In addition to Eastern Catalytic's line of universal converters, we offer diesel, high performance, direct-fit, and heavy-duty catalytic converters covering over 900 applications. Our expanded range includes more configuration choices for inlet and outlet, air tubes, and O² sensors.

Value

Compare Eastern's value to the competition. Our flexible and efficient manufacturing facilities in the US, Mexico, and the UK make our converter lines highly competitive. And with Eastern, you're assured of quality that meets or exceeds OEM specs.

Certified Worldwide

Eastern's world-class quality and innovation have helped the company earn over 72 certifications in 48 countries, including the U.S., Mexico, Europe, Middle East, and China. Eastern has converters that are EPA compliant for use on OBD II vehicles.

OBD II Compliant

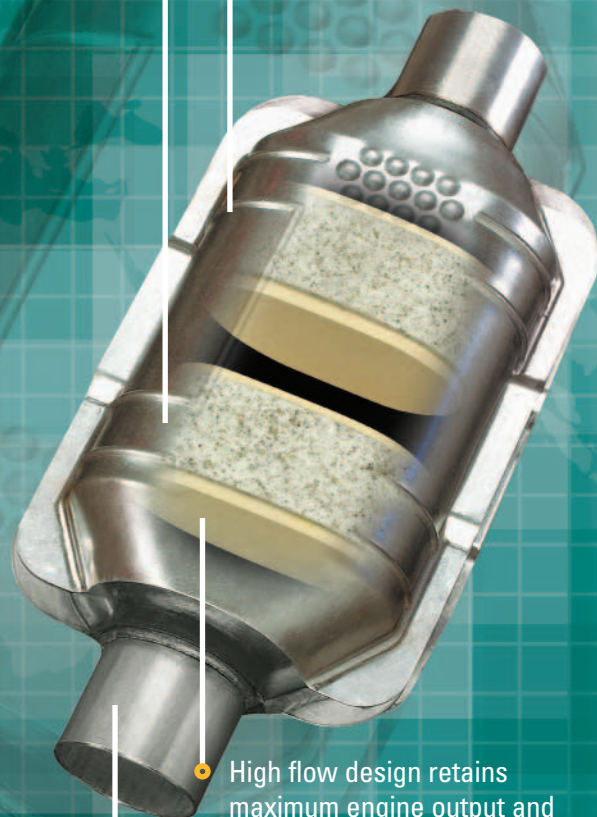

All Eastern converters are approved for use in 49 states on OBD II vehicles, and a new product series is available that is compliant for use on OBD II vehicles in California. Our converters meet all Federal EPA requirements for 49 states and perform as required with all OBD II systems currently in use. Our converters come with all required O² sensor ports.

Our proprietary chemistry yields highly efficient loadings for lower cost and better converter efficiency.

Full length top and bottom heat shields on most universal converters.

High flow design retains maximum engine output and maximizes catalytic efficiency.

Complete range of inlet and outlet diameters. In addition to a complete universal line, Eastern offers a wide range of diesel, high performance, and direct-fit converters.
